

# Riforma Mono LL

## Bold

Font Format: Opentype PostScript (Opentype CFF)  
Designer: NORM (Dimitri Bruni, Manuel Krebs, Ludovic  
Varone) (2021-2023)

A large, bold, black capital letter 'R' is centered on a solid red rectangular background. The 'R' is rendered in a clean, modern, sans-serif style, consistent with the 'Riforma Mono LL' font family.

# Glyph Map

# OpenType Layout Features

For details about OpenType Layout Features see the [OpenType Layout tag registry](#).

## Substitution Features

**Access All Alternates**  
This feature makes all variations of a selected character accessible.

**Contextual Alternates**  
In specified situations, replaces default glyphs with alternate forms which provide better joining behavior.

**Standard Ligatures**  
Replaces a sequence of glyphs with a single glyph which is preferred for typographic purposes. This feature covers the ligatures which the designer/manufacturer judges should be used in normal conditions.

**Discretionary Ligatures**  
Replaces a sequence of glyphs with a single glyph which is preferred for typographic purposes. This feature covers those ligatures which may be used for special effect, at the user's preference.

**Slashed Zero**  
Some fonts contain both a default form of zero, and an alternative form which uses a diagonal slash through the counter. This feature allows the user to change from the default 0 to a slashed form.

**Numerators**  
Replaces selected figures which precede a slash with numerator figures, and replaces the typographic slash with the fraction slash.

**Denominators**  
Replaces selected figures which follow a slash with denominator figures.

**Fractions**  
Replaces figures separated by a slash with 'common' (diagonal) fractions.

**Superscript**  
Replaces lining or oldstyle figures with superior figures (primarily for footnote indication), and may replace lowercase letters with superior letters (primarily for abbreviated French titles).

**Subscript**  
The "subs" feature may replace a default glyph with a subscript glyph.

**Ordinals**  
Replaces default alphabetic glyphs with the corresponding ordinal forms for use after figures.

**Case-Sensitive Forms**  
Shifts various punctuation marks up to a position that works better with all-capital sequences or sets of lining figures; also changes oldstyle figures to lining figures.

**Localized Forms**  
This feature enables localized forms of glyphs to be substituted for default forms.

**Stylistic Alternates**  
Many fonts contain alternate glyph designs for a purely esthetic effect; these don't always fit into a clear category like swash or historical. This feature replaces the default forms with the stylistic alternates.

**Stylistic Set 1 (Diagonal Endings)**  
Glyphs in stylistic sets may be designed to harmonise visually, interact in particular ways, or otherwise work together.

**Stylistic Set 2 (Titling f i j t)**

**Stylistic Set 3 (Stacked Fractions)**

**Stylistic Set 17 (Swiss Franc)**

Stylistic Set 20  
(Multiply)

**Glyph Composition / Decomposition**  
To minimize the number of glyph alternates, it is sometimes desired to decompose a character into two glyphs. Additionally, it may be preferable to compose two characters into a single glyph for better glyph processing. This feature permits such composition/decomposition.

1•①

**Alternate Annotation Forms**  
Replaces default glyphs with various notational forms (e.g. glyphs placed in open or solid circles, squares, parentheses, diamonds or rounded boxes).

**Ornaments**  
This feature gives the user access to ornament glyphs (e.g. fleurons, dingbats and border elements) in the font.

## Positioning Features

**Mark Positioning**  
Positions mark glyphs with respect to base glyphs.

**Mark to Mark Positioning**  
Positions marks with respect to other marks.  
Required in various non-Latin scripts like Arabic.

## All Alternates

All alternates are accessible with OpenType layout feature capable applications. If not specified, the feature is registered for all language systems.
